

Subconscious programming for Google Cloud APIs

Checkout
the blog 

Our goal was to simplify Google Cloud API's for ABAP developers to consume by hiding the complex underlying features related to connectivity, authentication, error and exception handling, data marshaling, logging etc.

Here are some behind-the-scenes insights into the various engineering excellence in ABAP SDK, enabling ABAPers to focus on business process innovation.

Bird's eye view of some of the engineering excellence features

Single-Window

Exception Handling

Implicit Logging

Improved Readability

Pre-built Intelligence

Code Wizard

Multiple Auth Options

Guided Tools

Some quick reference...
