

Google Workspace with ABAP SDK for Google Cloud

Checkout our blog 

Google Workspace offers a wide range of developer products and tools that let you connect your service with Google Workspace or extend Google Workspace apps like Gmail, Google Drive, and Google Chat.

Now, this capability is just a method call away, example with Gmail

Example use case of PO processing with Gmail

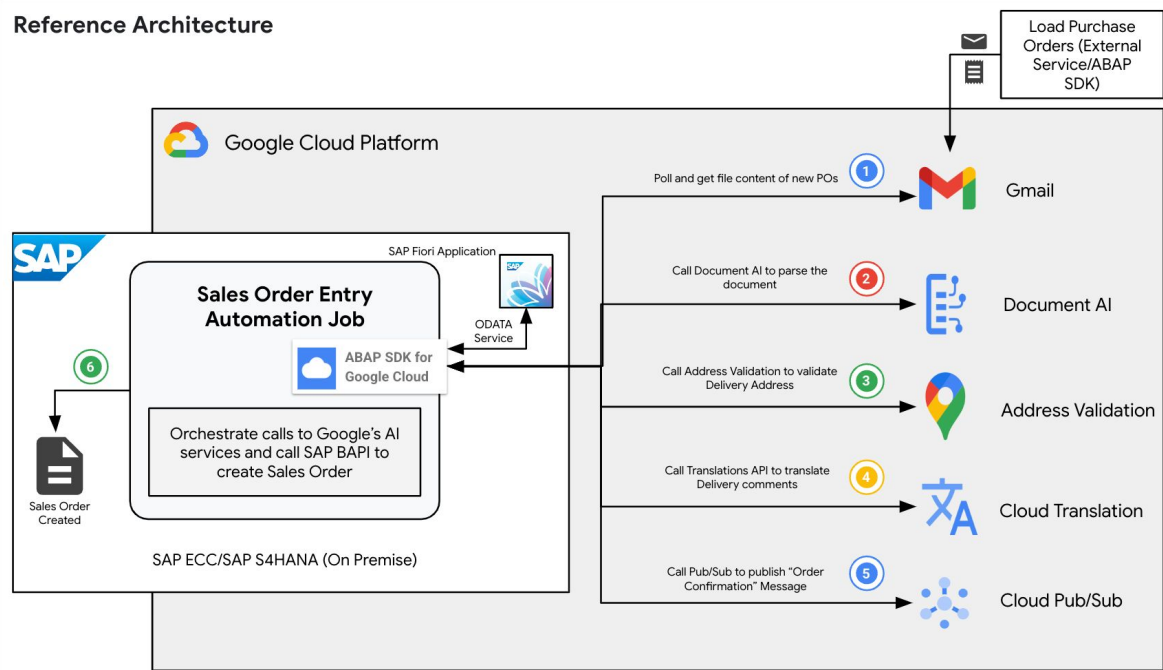

Checkout quick demo

ABAP SDK is the enabler for

- 1 Polling and getting the file contents from Gmail mailbox
- 2 Calling Document AI to parse PO attachments
- 3 Calling Address Validation to validate delivery address
- 4 Calling Translation API to translate delivery comments
- 5 Calling Pub/Sub to publish "Order Confirmation"

Reference Architecture

Some quick references....
