## ABAP SDK Opens the window for many use cases

SAP customers can now use the ABAP programming language to interact with Google Cloud services and also integrate with **Industry solutions** built on top of the Google Cloud.

This opens up a wide range of use cases, such as integrating with **Google** and **Partner** provided solutions like Google Cortex Framework, the Manufacturing data engine, Retail shelf AI, and many more.

Customer use the principles of side-by-side extension and build solution on Google cloud, which can be integrated with SAP using ABAP SDK following the similar pattern.

Examples of Solution Integrations with SAP

Manufacturing Data Engine

Google Cortex

Google Shelf Checking AI

Other Industry Solutions.
